SILICONE WIPER BLADE

PRECISION GLIDE FOR PROTECTED GLASS

QUIET PERFORMANCE. ENGINEERED CONTACT.

ENGINEERED FOR

PROTECTED GLASS

AeroSilk is designed as the finishing component in a complete windshield-care system.

Its silicone wiping edge is optimized for smooth, controlled contact across windshield protection film, coated glass, and conventional automotive glass.

01

FILM-COMPATIBLE

Gentle contact profile

02

COATING-COMPATIBLE

Designed for coated glass

03

ALL-WEATHER CONTROL

Heat, cold and UV exposure

CONTROL IN EVERY SWEEP

REFINED PERFORMANCE

01

QUIET GLIDE

A precision-molded silicone edge supports smooth motion with reduced operational noise.

02

ANTI-CHATTER

A stable beam profile helps reduce vibration, skipping, and inconsistent contact.

03

HYDROPHOBIC CONTROL

Designed to complement water-repellent windshield coatings and clear wet-weather vision.

04

GENTLE CONTACT

A film-conscious wiping surface for protected windshields and premium automotive glass.

AEROSILK SERIES

PRECISION GLIDE FOR PROTECTED GLASS

SILICONE ENGINEERING

SMOOTH BY DESIGN

AeroSilk combines a durable silicone wiping edge with a low-profile beam structure for balanced pressure distribution across the windshield.

-
- + Flexible beam architecture
 - + Consistent edge contact
 - + Low-profile aerodynamic form
 - + Universal adapter kit included

PERFORMANCE MAY VARY BY VEHICLE, CONDITIONS,
INSTALLATION, AND WINDSHIELD SURFACE.

PPF INNOVATION

QUICK INSTALL

FOUR PRECISE STEPS

1

REMOVE OLD BLADE

Lift the arm carefully and release the existing blade.

2

SELECT ADAPTER

Match the included adapter to the vehicle wiper arm.

3

LOCK SECURELY

Attach until fully seated, then verify the connection.

4

TEST WITH FLUID

Wet the windshield before testing. Never operate dry.

CARE

Clean the windshield and blade edge regularly. Replace the blade if damaged or if wiping performance declines. Confirm vehicle fitment and blade size before installation.
